Profile

Senior software engineer with 8 years of experience building remote-first SaaS products.
Focused on TypeScript, React, Python, FastAPI, PostgreSQL, Supabase, Docker, and AWS.

Experience

Senior Fullstack Developer, Remote SaaS Platform, 2021-2026

- Built a React and TypeScript dashboard used by product and operations teams.
- Designed FastAPI services for profile enrichment, reporting, and background workflows.
- Implemented PostgreSQL schemas, Supabase Auth integration, and private file storage.
- Optimized API latency and maintained Docker-based deployments on cloud infrastructure.

Backend Developer, Analytics Startup, 2018-2021

- Developed Python and REST APIs for data ingestion and customer-facing integrations.
- Migrated legacy SQL reports into PostgreSQL views and scheduled processing jobs.
- Led a small project team delivering role-based access control and audit logging.

Frontend Developer, Product Studio, 2016-2018

- Built responsive React interfaces for B2B web applications.
- Maintained JavaScript components, Git workflows, and release checklists.

Skills

TypeScript, JavaScript, React, Node.js, Python, FastAPI, REST, SQL, PostgreSQL, Supabase, Docker, AWS, Git

Education

MSc Computer Science, Warsaw University of Technology
